Subject: Response to Questions Concerning the Start-Up of a DOE Training Service Provider

In response to questions that have arisen based on the recent DOECAST announcing the start-up of a DOE Training Service Provider (Enterprise Training Services), employees should be aware that no local changes to the ORO training registration process and other services will be implemented until such time as we are confident that logistics and systems are established that will provide the same level of support to our staff as they have had in the past. You should continue to register for training and education courses through the Training and Development web site as usual.

We will provide you with periodic updates as we move further along in the MEO implementation process.
