

Dear Colleagues

I am pleased to announce the selection of Larry C. Kelly as the Manager of the Oak Ridge Office (ORO). Mr. Kelly has been a member of the Oak Ridge community since 1990 and has over thirty years of federal service, including 21 years with the Department of Energy at ORO where he has been responsible for programs in the areas of environment, safety, and health and quality assurance and for managing ES&H support through the Office of Science Integrated Support Center. He is a Senior Technical Safety Manager and has recently served as the Acting Deputy Manager of ORO. Since April 2012, he has served as the Acting Manager of ORO.

Prior to joining DOE, Mr. Kelly worked for nine years with the Tennessee Valley Authority as an Engineer and Manager providing expertise in design, construction, and operation of commercial nuclear power plants. He also worked as an Environmental Engineer in the private sector for International Paper Company.

Mr. Kelly possesses the vision, professionalism, and technical background to lead the new ORO organization in support of the future research mission of the Office of Science. Please join me in welcoming Larry into his new management position and I know that you will give him your full support as he takes on this new professional endeavor.

Bill Brinkman
Director, Office of Science
