

BJC ITMS Database Support

Sorted by Acronym

	Application Name	Acronym	Application Description	Functional Organization	Business Area	Platform	Software Used
1	Accruals Management	ACCRUALS	An access database used to collect and process costs that need to be accrued to ensure that costs are reported in appropriate accounting period. A data file is generated for uploading to Oracle General Ledger.	Business Systems	Chief Financial Officer	Server	Access
2	ACH Transmissions	ACHTRANS	The ACHTRANS application processes employee pay transactions and gives the CFO organization the ability to modify the ACH file that is produced from the Cyborg HR/Payroll application. The edited file is then transmitted to the bank, on a weekly basis, using HYperterminal. If no modifications are required or the payroll system is running in disaster recovery mode, the ACH files may be transmitted to the banks as they are produced from the Cyborg HR/Payroll application.	Business Systems	Chief Financial Officer	Server	Micro FocusCOBOL, Hyperterminal for transmissions
3	Job Posting / Applicant Tracking	APPTRAC	APPTRAC includes staffing requisition management, posting of internal jobs, and the tracking of internal and external applicants	Business Systems	Human Resources	Server	Cold Fusion, MS Access
4	Assessment Database	ASSESS	An ACCESS database designed to give BJC a tool to track all internal Assessments (QA Independent Assessments, Mgt Assessments, Surveillances, BJC Internal Audits, DOE Audits and Regulatory Audits). It allows BJC to track what is scheduled for any given time period.	Safety Systems Integration	Performance Quality Assurance	Server	Access, ColdFusion
5	Baseline Change Proposal Log	BCPL	Log of Baseline change Proposals.	Business Systems	Project Control	Server	Excel and Netscape Communicator
6	Oracle Financials	BJCFIN	Oracle Financials is a commercial off-the-shelf (COTS) software package from Oracle Corporation. The package is used to support the finance and accounting function, including general ledger, accounts receivable, accounts payable, purchasing and labor distribution.	Business Systems	Chief Financial Officer	Server	COTS, Oracle Financials 11.5.3, PERL (5.002), HTML (3.2), Cold Fusion
7	Bechtel Procurement System	BPS	Bechtel Procurement System is the basic procurement database system. It is used to enter all material/service requisitions, work releases and awarded subcontract/purchase order/master blanket agreement data. BPS is a Commercial Off-the-Shelf package procured from Bechtel Company and licensed to BJC. Workstation is located in K-1007	Business Systems	Procurement	Server	Oracle, Access 97, Visual Basic, C++
8	DOE UF6 Cylinder Information Database	CID	CID maintains the inventory of all DOE owned UF6 cylinders at ETPP, PGDP, and Portsmouth and related maintenance and surveillance data. The system also serves as a tool to schedule maintenance and surveillance activities.	ETTP Closure Project	Infrastructure Reduction & Remedial Action Project	Server	Oracle 8i, Cold Fusion 6.0 MX, PL/SQL, Oracle Web Application Server
9	Correspondence Log	Corrlog	Used by all secretaries at Paducah to track correspondence and create document numbers in accordance with Bechtel Jacobs rules.	Business Systems	Information Technology	Server	Team-Up

BJC ITMS Database Support

Sorted by Acronym

	Application Name	Acronym	Application Description	Functional Organization	Business Area	Platform	Software Used
10	Confined Space Module	CSM	Site wide inventory of permit-required and non-permit required confined space.	Safety Systems Integration	Environmental Safety and Health	Server	Oracle, Cold Fusion
11	Capital Work in Progress	CWIP	Capital Work in Progress is a financial reporting system for capital and no-color capital projects. It is for internal use by the Capital Accounting group and does not directly provide reports to DOE or BJC Project Management. Its primary function is to facilitate the comparison of project costs and commitments against the authorized funding for the projects individually.	Business Systems	Chief Financial Officer	Server	Access
12	Human Resources System	CYBORG	The Cyborg Solution Series/ST System, is a comprehensive, commercial off the shelf (COTS) Human Resources and Payroll package. This application supports the functions of Benefits, Compensation, Labor Relations, Staffing, Training, Workforce Diversity and Payroll. It receives time and effort input from the Payroll, Absence, and Labor System.	Business Systems	CFO/HR	Server	COTS, Oracle, CYBORG V4.5.3
13	Digital Dialer Fire Alarm System	DDFAS	The Digital Dialer Fire Alarm System is a central station fire alarm application that uses a UNIX based network server. Fire alarms are transmitted over in-place telephone circuits to digital receiving panels. The panels send digital information to the UNIX server that uses a DICE software program to send alarm information displays to PC terminals in the fire alarm room and the PSS office.	ETTP Closure Project	Fire Protection / Emergency Management	Server	UNIX
14	Dosimetry Records System	DRS	The database is a Dosimetry Records System which collects, stores, and reports Dosimetry data as required by federal regulations. It also contains a small application to track Radioactive Sources.	Safety Systems Integration	Environmental Safety and Health	Server	
15	Data Warehouse	DW	The Data Warehouse accepts data from a variety of sources and re-formats the data and integrates the results into a managed environment from which data analysis and reporting may be conducted. The Web Browser is an end-user interface to the whole pool of data (or any other pool of Oracle-based data) from which queries and reports may be generated. The Data Warehouse has not been built in an application specific format and can be utilized by any tool convenient to the user as long as the user has read access to the data and as long as the tool can read an Oracle database.	Business Systems	Information Technology	Server	Oracle 8.1.7, C++, Java 1.2, javascript, cgi, UNIX/UNIX scripts, HTML, PL/SQL, Oracle DBL, Access
16	Dynamic Nuclear Material Accountability System	DYMCAS	It is used for accountability of nuclear material. It tracks the amount of material in cylinders. Helps to coordinate the transfer of materials and generates data for NMMSS. The Nuclear Materials Accountability System (NUMAS) application is owned by the United States Enrichment Corp. (USEC) in Paducah, Kentucky. They are an NRC licensee but continue to do NMC&A work for BJC in Paducah. PORTS: DYMCAS is a USEC leased system. All maintenance and support activities are provided by USEC.	ETTP Projects	USEC Leased System	Server	

BJC ITMS Database Support

Sorted by Acronym

Appendix B-2.6
DE-RP05-04OR23027

	Application Name	Acronym	Application Description	Functional Organization	Business Area	Platform	Software Used
17	Electronic Document Management System	EDMS	The EDMS supports the creation, revision, assembly, tracking, and record retention of electronic and hardcopy versions of BJC ER and Quality documents. EDMS meets DOE-specific records management requirements and addresses document tracking, standard and controlled distribution, and CERCLA requirements related to the Administrative Record. All correspondence from the DOE, EPA and TDEC are scanned into the system and electronically distributed to the appropriate BJC management. Also the EDMS system supports BJC Legal in their efforts to comply with the DOE Sick Workers Act and is used to request, track, store and respond to past DOE workers claims.	Business Systems	Administrative Services	Server	COTS, Documentum 4.2.6, Solaris 2.8, RightSite 3.5.2 (with Solaris 8), Access
18	Equal Employment Opportunity Affirmative Action	EEO/AA	Comprised of weekly, monthly, quarterly, and annual statistical reports and detail reports drawn from employee and compensation data services that are used by the office of Workforce Diversity to comply with Federal regulations regarding monitoring	Business Systems	Human Resources	Server	SAS
19	Environmental Restoration Waste Generation Forecas	ERWGF	The Environmental Restoration Waste Generation Forecast system maintains the forecast of waste from site remediation projects managed by Bechtel Jacobs Company (BJC) for the Department of Energy (DOE). The database reflects technical scope identified in the Environmental Management Life Cycle Baseline and supports the selection of appropriate waste disposition options.	Technical Support	Waste Generation Services	Server	HTML, DHTML, ASP, SQL Server 7.0
20	Facility Acceptance Testing-Container AnalysisTool	FATCAT	FATCAT is designed to maintain the facility categorization sum-of-fraction calculations using data from the WIMS database for WESKEM facilities at East Tennessee Technology Park (ETTP), the Y-12 Security Complex, and the Oak Ridge National Laboratory.	Reservation Cleanup and Waste Management Project	Waste Management	Server	Visual Basic 6, ASP, SQLServer 7
21	Fee Database	FEE	Potential incentive fee to be earned by Bechtel Jacobs Company, LLC, from DOE is estimated and accrued to project cost monthly. This automated program allocates the incentive fee accrual across BJC subprojects in accordance with each subproject's proportionate share of cost.	Business Systems	Chief Financial Officer	Server	Microsoft Access
22	Facility Information Management System	FIMS	FIMS maintains real property information, actual cost of real property, etc. DOE-mandated system.	Technical Support	Property & Real Estate	Server	Access
23	FitMaster II	FITPLUS	Designed to assist operators with accurate and efficient respirator fit testing in accordance with respiratory standards published in OSHA and guidelines provided by ANSI. The system also helps the managers with various data management functions which include maintaining reference data, reports, and archiving old data.	Safety Systems Integration	Environmental Safety and Health	Server	COTS, Visual Basic 6.0

BJC ITMS Database Support

Sorted by Acronym

Appendix B-2.6
DE-RP05-04OR23027

	Application Name	Acronym	Application Description	Functional Organization	Business Area	Platform	Software Used
24	Fleet Management	FLEETMGT	This application data base is an Access database supplying DOE with monthly and YTD reports of vehicle fuel, labor and materials. The reports lists vehicle maintenance costs by vehicle number and type of vehicle.	Business Systems	Procurement	Server	Access
25	Flexible Spending Accounts	FLEX	BJCFLEX reformats flexible spending account data from Cyborg into an AETNA-specified format for transmission. It also produces a report for balancing purposes.	Business Systems	Chief Financial Officer	Server	Cyborg English Language, SAS
26	File Review Checklist	FRC	Management review surveys for different stages of the procurement process. Statistics are extracted from the application and reported to DOE.	Business Systems	Procurement	Server	Access
27	General Locator Information & Non-Employee System	GLI-NES Web	GLI-NES Web allows employees and subcontractors to update their "location" and home address information. The ability to collect and maintain non-employee contract information was added April 2000. This application replaced NESWEB and GLIWEB	Business Systems	Information Technology	Server	Oracle, Cold Fusion 4.0
28	Health Hazard Information Module	HHIM	Accesses the chemical and physical hazards associated with buildings at various plants. The assessment is administered by the Industrial Hygiene Department.	Safety Systems Integration	Environmental Safety and Health	Server	Delphi 2.3; Oracle 7.3.4
29	Human Resources Information System	HRIS	This application downloads Cyborg data, which comprises 95% of HRIS. The remaining 5% is information that is hand-entered to satisfy Bechtel, San Francisco's data requirements. HRIS exists to "quickly" answer HR and BJC management employee data requests. There are some standard reports, however, most of the requests for information are satisfied using "ad hoc" queries/reports.	Business Systems	Human Resources	Server	Access
30	I Care - We Care	ICARE	The I Care - We Care application captures information from employee health and safety concerns at ETPP. The application provides the capability to query the submittals for status and to look for common trends of employee concerns.	Safety Systems Integration	Performance/Quality Assurance	Server	Access, Cold Fusion
31	Issues Corrective Actions Tracking System	ICATS	The ICATS application is used to track issues and corrective actions from assessments, occurrences, potential PAAA noncompliances, and I Care - We Care submittals. ICATS captures data in two record types - Issue information and action information. The Issue information contains information about the specific issue and the analysis of the issue. The Action information contains the specific actions that are taken to resolve the issue. For each issue, there can be one or more associated actions. A web interface provides limited querying/reporting capabilities.	Safety Systems Integration	Performance/Quality Assurance	Server	Access, ColdFusion (CA-5 software from Harrington Group)/ CAWEB

BJC ITMS Database Support

Sorted by Acronym

	Application Name	Acronym	Application Description	Functional Organization	Business Area	Platform	Software Used
32	Instrument Calibration System	ICS	The program provides for input of pre and post calibration information and trending reports by either mk_number or instrument type. Output is directed to an attached dedicated printer. This printed information serves as the required bound logbook. The program also provides options to view the data, perform system backup, and several manager functions. These manager functions include editing the calibration data, adding instruments to the instrument authority file, and editing the data on those instruments	Safety Systems Integration	Industrial Hygiene	Server	ColdFusion; MS Access 97
33	Integrated Drug Testing System	IDTS	Designed to allow users to maintain groups of employees (known as drug pools), for random drug testing. The system will randomly select candidates for testing, and provides the capability to maintain drug test results.	Business Systems	Labor Relations	Server	Cold Fusion and HTML
34	Industrial Hygiene Analytical System	IHAS	A computerized tracking system used by the various plant Industrial Hygiene Departments to track their air sampling and employee exposure results. This data includes sampling location, requestor, investigator and supervisor, type of sample, sampling protocol, operation category, employees involved in sampling results, recommendations and follow-up.	Safety Systems Integration	Environmental Safety and Health	Server	Oracle, Delphi 2.3
35	Insurance Eligibility	INSELIG	The Insurance Eligibility application extracts insurance eligibility information from CYBORG for long term care (LTC), short term disability (STD, medical, dental, and vision. This information is formatted into vendor eligibility files for each insurance provider. The files are then transmitted electronically to the provider. In addition, some reports are provided.	Business Systems	Human Resources	Server	CYBORG/English Language; PGP encryption tool
36	K25/K27 Buildings D&D Project	K25K27D&D	K25/K27 Buildings D&D Project Web Page	ETTP Closure Project	K25 / 27 Project	Server	HTML, ColdFusion
37	K-screen Transaction Import to Cyborg	KTRANS	K-screen Transaction Import to Cyborg. This application collects subcontractor benefits accounting data from all sub-contractors participating in the BJC multi employer benefits plans. This data is processed in MicroSoft Access and transactions are formatted for input into the Cyborg HR/Payroll system to update the 3BJWFT company. In addition, Mellon Bank sends payment and deduction information to the CFO organization to update the Retiree Pension Company	Business Systems	Chief Financial Officer	Server	Access
38	Legacy Claims	LCLAIMS	UDT combined the functionality of LGLWKCMP, FOIAPRIV, LEGALHIST and WAO. The system processes and tracks Workers' Compensation claims, DOE FOIA/Privacy Act requests, and requests that come from the Workers' Advocacy Office.	Legal and Risk Management	Legal	Server	MS Access, VB, SQL
39	Historical Data for Legal Organization	LEGALHIST	Online query application for Work History data for BJC employees.	Legal and Risk Management	Legal	Server	Access

BJC ITMS Database Support

Sorted by Acronym

	Application Name	Acronym	Application Description	Functional Organization	Business Area	Platform	Software Used
40	Lessons Learned System	LESSONS	This application automates the program for identifying, disseminating and utilizing positive and negative operating experiences, i.e. Lessons Learned, which may be applicable to other organizations.	Safety Systems Integration	Performance/Quality Assurance	Server	Access, Cold Fusion
41	Magic	MAGIC	Help Desk Application for WIMS	Technical Support		Server	
42	MARS Reporting	MARS	An application used to validate, edit, and transform cost data from Oracle General Ledger, PRISM, CWIP, and Capital Commitments into required format for reporting to DOE.	Business Systems	Chief Financial Officer	Server	Access
43	Medical Occupational Health Information System	MOHIS	Provides an integrated, secure, highly interactive method for supporting the Occupational Health at ETP Health Services, including scheduling appointments, tracking visits, recording laboratory test results, maintaining a medical history, documenting provider information, and enrollment of patients in programs of medical surveillance.	Safety Systems Integration	Environmental Safety and Health	Server	Oracle 8.1.7, Oracle Forms & Reports 6i
44	Nuclear Materials Inventory System	NUMIS	Contains classified information for accountable nuclear materials under Bechtel Jacobs Company (BJC) purview at the Oak Ridge sites (East Tennessee Technology Park, Oak Ridge National Laboratory, and the Y-12 National Security Complex) as required by DOE Order O 474.1A. Obtained classified status on April 1, 2002.	ETTP Closure Project	Security	Server	Empress RDBMs suite V8.60, Red Hat Linux 7.0 OS
45	Oracle Financials Isix Interfaces	OFII	This application provides automated interfaces from the Bechtel Procurement System (BPS) to Oracle Financials (BJCFIN) for vendor, GL code combination, standard PO, blanket, and release data. Data is extracted from BPS and preprocessed using Microsoft Access before passing through the commercial software Isix interfaces from DARC Corporation to update BJCFIN.	Business Systems	Chief Financial Officer	Server	COTS, DARC Isix, Microsoft Access
46	Oak Ridge Environmental Information System	OREIS	OREIS provides a consolidated database of environmental measurements and geographic data and associated information to support the Environmental Data Projects and to fulfill the data requirements outlined in the Federal Facility Agreement (FFA) and Tennessee Oversight Agreement (TOA).	Technical Support	Engineering & Environmental Services	Server	Oracle, PERL, JAVA, ARCINFO, ARCVIEW, WINZIP, PC SW TORC, ACCESS, ARCIMS
47	Oak Ridge Environmental Information System-Pad	OREIS-PAD	Paducah OREIS provides a consolidated database of environmental and waste measurements, geographical data, and associated information to support the Paducah Project and to fulfill the data requirements outlined in the Kentucky Federal Facilities Agreement	Paducah and Portsmouth	Paducah Project	Server	Oracle, Oracle Developer 2000, Oracle Discoverer 2000
48	Outgoing Transfer Vouchers Database	OUTVOUCH	Processes vouchers to transfer cost to other DOE sites. The database assigns information to each voucher that is needed in the MARS reporting system at month-end.	Business Systems	Chief Financials Officer	Server	Microsoft Access

BJC ITMS Database Support

Sorted by Acronym

	Application Name	Acronym	Application Description	Functional Organization	Business Area	Platform	Software Used
49	Price Anderson Amendment Act	PAAA-Legal	This system is designed to track all references to the PAAA used by BJC Legal and Risk Management at ORO facilities.	Legal and Risk Management	Legal	Server	COTS, dtSearch
50	Payroll Absence and Labor System	PALS	Payroll, Absence and Labor System (PALS) is a paperless time-recording system. PALS is a fully electronic, web-based time-recording solution that is accessible via the Intranet. PALS supports all of the BJC organizations. PALS allows the same personnel that used to complete and approve time cards, or enter and approve effort data, to input and approve payroll and effort time data into a central system.	Business Systems	Chief Financial Officer	Server	Oracle, PRO*C, PL/SQL, ColdFusion, XVT 4.23, Microsoft C, JavaC
51	Purchasing Accounting Reporting Information System	PARIS	It is a procurement/financial credit card system, using GE Capital software	Business Systems	Procurement	Server	COTS, Oracle RDBMS 9.2.0; 64-bit SQL*Net 2.3 on clients
52	Public Affairs Tracking Database	PATD	This application tracks the approval process for BJC Public Affairs documents (news releases, fact sheets, etc.).	Public Affairs	Public Affairs	Server	Cold Fusion, Access, Web Browser
53	PC Asset Management	PCAM	Identification of government computers being used by BJC. Physical identification and physical location of CPUs only.	Business Systems	Information Technology	Server	Cold Fusion, Access, HTML
54	Portsmouth Configuration Management Database	PCMDB	Used to track configuration management items	Paducah and Portsmouth	Portsmouth Projects	Server	Access 97
55	Proforma Document Change Management	PDCM	Tracks the Proforma documents associated with BJC contracts of over \$100,000 and reports to DOE.	Business Systems	Procurement	Server	Microsoft Access 97
56	Project Environmental Measurements System	PEMS	PEMS provides organization, integrity, security, traceability, and consistency of the environmental measurements data generated during a project life cycle. The application supports sample analysis planning, laboratory statements of work, field planning and logistics, sample collection and shipment, field measurements and validation, barcoding, analytical laboratory results, sample tracking, and assessment.	Technical Support	Engineering & Environmental Services	Server	Oracle, MS C, PC SW, MS C Compiler, Visio (ERD diagram), VSS, Adobe Acrobat Reader
57	Project Environmental Measurements System-Paducah	PEMS-PADUCAH	Paducah PEMS provides a database system of environmental and waste measurements, geographical data, and associated information generated during a Paducah Project task life cycle. The application supports sample analysis planning, laboratory statements of work, field planning and logistics, sample collection and shipment, field measurements and validation, analytical laboratory results, sample tracking, and assessment.	Paducah and Portsmouth	Paducah Projects	Server	Access
58	Pension Actuarial	PENSACTU	An annual file created for BJC HR to provide to their vendor for Pension Valuation and Compliance testing.	Business Systems	Human Resources	Server	SQL

BJC ITMS Database Support

Sorted by Acronym

	Application Name	Acronym	Application Description	Functional Organization	Business Area	Platform	Software Used
59	Annual Benefits Statement	PENSBENF	An annual file is created and sent to Towers Perrin. Towers Perrin uses this file to create a summary of each employee's benefits and estimated income and savings at retirement. These individual summaries are commonly called "annual benefit statements".	Business Systems	Human Resources	Server	SAS, COBOL, Net Express
60	Pension Estimate System	PES	PES is an interactive, Web-based application that projects retirement estimates for employees. Application accessed by users for calculating active employee's pension benefits.	Business Systems	Human Resources	Server	Cold Fusion, PLSQL, Oracle Database
61	Project Management Cost Processor	PMCP	The Project Management Cost Processor (PMCP), formerly known as Management Control Information System (MCIS), provides centralized monitoring and reporting of project estimates, actual cost, and performance. It provides the Department of Energy and the Management and Integration Contractor, Bechtel Jacobs Company, LLC (BJC), with the capability of monitoring projects using consistent business practices while allowing subcontractors to use cost-effective commercial off-the-shelf scheduling and estimating tools for individual project detail management.	Business Systems	Project Control	Server	PowerBuilder v6.5, Unix scrips, PL/SQL, ProC, Visual C++ v 4.0
62	Positive Pay and Check Reconciliation	POSPAY	This application applies the CQ software. Payroll files are generated in CYBORG System, and FTPed to the PC in Payroll group. There are several on-line applications that give user options for this job. Generate positive pay file (paper checks). Positive pay file is transmitted to the bank on a daily basis. User initializes the input from previous day prior to new input. This application is also ENDSHEET checks. Check-recon job runs once a month with the files from the bank for cleared checks.	Business Systems	Chief Financial Officer	Server	CQ software Tools for file transmissions to vendor, MicroFocus COBOL/SAS
63	Property Information System	PRISM	PRISM is an application for tracking accountable and capital property that includes both accountability and accounting functions. The module for physical accountability has been implemented by Property Management. The Capital Accounting module for Financial Accounting of capital assets has been implemented by Capital and Disbursement Accounting.	Business Systems	Chief Financial Officer	Server	Oracle, PL/SQL 7.3, C, HTML
64	Procedures Tracking Database	PROC	This application tracks the number, title, revision number, owners, and dates of current procedure revisions. This database is also connected to the web and provides the search information when someone searches for a procedure.	Safety Systems Integration	Performance/Quality Assurance	Server	Access, Cold Fusion
65	Radioactive Airborne Contamination Survey	RACS	Contains information obtained through continuous and on-going job air monitoring surveys, looking for airborne contamination through the use of sample counters.	Safety Systems Integration	Environmental Safety and Health	Server	Powerbuilder 7.0.3, Oracle 8
66	Regulatory Agreement Information Management (Rev)	RAIMSLight	RAIMS provides information and reports for Resource Conservation and Recovery Act (RCRA) Hazardous and Solid Waste Amendments Act (HSWA) solid waste management units (SWMUs), FFA Appendix C AOCs and FFA Appendix F tanks AOC, Appendix E and tank-related project information. Data has been maintained in this system since 1992.	Business Systems	Project Control	Server	ASP, Oracle 8i

BJC ITMS Database Support

Appendix B-2.6
DE-RP05-04OR23027

	Application Name	Acronym	Application Description	Functional Organization	Business Area	Platform	Software Used
67	Remedy HR Help Desk	REMEDY	COTS help desk product used to track all customer calls coming in to the HR Help Desk. Customer questions and problems are entered and tracked.	Business Systems	Human Resources	Server	COTS, REMEDY (Remedy Corp.)
68	Records Inventory System	RIS	The Records Inventory System is a web based system designed to capture information about BJC records held in the field and allow for proper storage and destruction of records. This system has been designed to replace BJC field record inventories by allowing managers to input their own information about field held records. The BJC Records Manager can assign a DOE records disposition schedule to each of type record, once the record information has been captured. A BJC record holder has the ability to run reports from the web after the DOE disposition schedule has assigned. This report gives the record holder information about required retention of each record and also a basic inventory of the records that have been assigned in their name.	Business Systems	Administrative Services	Server	Visual Basic, Active Server Pages & Java Script
69	Reindustrialization Request for Services	RRFS	The database was established to provide an electronic system to track the request and approval process for Reindustrialization activities. This database enables us to track costs by buildings which is used for generation for analysis of lease costs.	ETTP Closure Project	Reindustrialization Support	Server	Web, Oracle 8, Pro-C
70	Radiological Work Permit (RWP) System	RWP	This application is used to generate, track, and terminate the Radiological Work Permits for the radiological work activities at ETTP. Bioassy schedule is also part of the system.	Safety Systems Integration	Environmental Safety and Health	Server	Oracle 8; Powerbuilder 7.0.3
71	Service Acquisition Information Database	SAID	This application records pertinent information about the site services that are available under the M&I contract, either through BJC subcontracts or other providers (work authorization with LM, etc.). The database is accessible through the web and provides users with quick "at-a-glance" information on what services are available and how to acquire them.	Business Systems	Procurement	Server	Access, Cold Fusion
72	Server Asset Management and Official Applications	SAMOA	This database lists all the applications and servers which are being used by Bechtel Jacobs Company LLC. The documentation and data necessary to manage these resources is included.	Business Systems	Information Technology	Server	MSAccess, Cold Fusion
73	Subcontractor Benefits Information System	SBIS	SBIS receives subcontractor employee and benefits information from CYBORG. SBIS uses this data to generate reports distributed to the subcontractors and benefits companies.	Business Systems	Chief Financial Officer	Server	Access
74	Service Centers	SC	Access databases used to allocate service centers' cost based on standard rates developed by Program Finance. Data files are generated for uploading to Oracle General Ledger monthly. As needed or at the end of each FY, variance allocations are made to adjust recovery to actual costs.	Business Systems	Chief Financial Officer	Server	Access

BJC ITMS Database Support

Sorted by Acronym

	Application Name	Acronym	Application Description	Functional Organization	Business Area	Platform	Software Used
75	Software Enhancement Approval Management	SEAM	This application provides a tool for Business contacts to request software enhancements. BJC IT can submit the request for estimate to the software support subcontractor. The software support subcontractor can submit an estimate back to BJC and await approval/rejection. The system also tracks the status of the request. The software support subcontractor marks the project complete once finished and then BJC can accept the enhancement as complete.	Business Systems	Information Technology	Server	Cold Fusion, MS Access Database
76	Safety Information Management	SIM	The SIM application maintains occupational injury and illness data for the site to ensure compliance with DOE Order 231. It collects and stores occupational injury and illness info., motor vehicle info., and <u>property damage information</u> .	Safety Systems Integration	Environmental Safety and Health	Server	Oracle, Delphi 2.3
77	Split-Funding Database	SPLITFND	The Split Funding database ensures that cost assignments/allocation between funding attributes are consistent with the DOE Financial Plan for scopes of work with multiple funding sources. It is a self-adjusting program that operates on year-to-date cost data. The program tracks funding percentages of split-funded projects and allocates monthly cost as appropriate.	Business Systems	Chief Financial Officer	Server	Microsoft Access
78	Software Project Update Distribution System	SPUDS	Purchase and download software packages and upgrades.	Business Systems	Information Technology	Server	C
79	Subcontractor Submittal Register	SSR	Client server application for administrative department. It uses a central account to store the user information, project and other shared data. This central account creates project accounts and grants users access to <u>projects</u> .	Business Systems	Administrative Services	Server	Oracle, Oracle Forms 4.5x, Oracle Reports 2.5x
80	Subcontractor Job Posting	SUBPOST	The application provides interactive web access for BJC personnel to review their resume, review current subcontractor job openings, and apply for open positions. Also, subcontractors can update their staffing plan and view resumes of BJC employees who bid on their open <u>positions</u> .	Business Systems	Human Resources	Server	Cold Fusion MX with Access 97 databases
81	SunTrust On-line Treasury Manager	SunTrust	Application provided by SunTrust Bank of Atlanta used for Web-based interactive monitoring of Bechtel Jacobs accounts.	Business Systems	Chief Financial Officer	Server	COTS, Sun Trust Web application
82	Supplier Questionnaire	Supplier	This application allows suppliers to enter data in a electronic questionnaire, giving the categories for which they can supply material. Buyers in procurement then use this system as one source of information <u>about suppliers</u> .	Business Systems	Procurement	Server	Access, Cold Fusion
83	Suspense	SUSPEN	An application used to determine journal entries in General Ledger with invalid code combinations and to create a data file for uploading to General Ledger that suspends these invalid entries.	Business Systems	Chief Financial Officer	Server	Access

BJC ITMS Database Support

Sorted by Acronym

	Application Name	Acronym	Application Description	Functional Organization	Business Area	Platform	Software Used
84	Turbo Activity Hazard Analysis	TAHA	This application provides the capability to produce Activity Hazard Assessment reports. The reports are based on various pieces of information such as activity description, job steps, hazards, controls and user comments.	Safety Systems Integration	Environmental Safety and Health	Server	Oracle 9i; Coldfusion
85	Tracker	TRACKER	Tracker is a Sample Management application for managing analytical sample analyses. It tracks the work from the time a Statement of Work (SOW) is created on the database through the results being received from the procured lab. It also tracks payments and invoicing.	Technical Support	Engineering & Environment Services	Server	Oracle, Cold Fusion, IIS
86	Cyborg Reporting Solution	TRS	TRS is a Cyborg delivered product that uses Cyborg ST Oracle Payroll, Human Resources, and Benefits data. The data is transferred to a datamart where Impromptu is used to provide customer access and ad hoc reporting. The package includes the Cognos PowerPlay product which uses the Impromptu datamart tables to create data information cubes for trend data analysis.	Business Systems	CFO/HR	Server	COTS Package with Customized functions
87	Transportation Services Virtual Office	TSVO	This application is used by Transportation and other BJC personnel to retrieve information regarding transportation issues. This site contains important links to DOE and US DOT information. There are also multiple forms and other information that are needed to perform transportation activities. This site was also developed in order to satisfy findings from DOE during the Core Hole 8 issue at ORNL. DOE personnel review this site during assessments to ensure that it is being maintained. Homepage for the Transportation Services Organization to provide information to all the employees and subcontractors. Provides maintenance of active and inactive employee testing data regarding transportation procedures.	Technical Support	Field Services	Server	Access, ColdFusion, HTML
88	Universal Computer Access Mgmt System	UCAMS	UCAMS provides an online, interactive process for the management of Userids, computer resources, and passwords associated with computer accounts. □	Business Systems	Information Technology	Server	C, Perl, HTML
89	United Way Campaign Reporting System	UWAY	Provides the Payroll Department Manager and each year's general United Way Campaign Committee with annual campaign informational support and employee updating through payroll deduction.	Business Systems	Chief Financial Officer	Server	SAS
90	BJC WebWhos Employee Information	WebWhos	Online directory for BJC, BWXT-Y12, UT/B, ORO staff	Business Systems	Information Technology	Server	C
91	Waste Information Tracking System	WITS	WITS is a comprehensive, integrated, and flexible information system for the cradle-to-grave management of waste and waste information to facilitate the fulfillment of regulatory obligations and site requirements.	Reservation Cleanup and Waste Management Project	Waste Disposition Project	Server	Oracle 7.3.x, UNIFACE 6.0, C, MS Visual C++ 6.0, Java 1.1.5

Sorted by Acronym

	Application Name	Acronym	Application Description	Functional Organization	Business Area	Platform	Software Used
92	Waste Management Waste Generation Forecast	WMWGF	The Waste Management Waste Generation Forecast (WM_WGF) database maintains the forecast of waste from Environmental Management (EM) projects managed by Bechtel Jacobs Company (BJC) for the Department of Energy (DOE). The database reflects technical scope identified in the EM Life Cycle Baseline and supports the reporting of waste performance measures required by the DOE. The database excludes waste generated by site remediation projects because those data are maintained in a separate system.	Technical Support	Waste Generation Services	Server	ASP, SQL Server 7.0
